

New premises to accommodate a growing team

Nancy, France, March 30th, 2016 – Ypso-Facto, a specialist in chemical and biochemical processes, announces today that it has moved to extended premises in Nancy to accommodate its local team and to support its development.

Since its creation in 2014, the company has hired 15 engineers and PhDs in chemistry, biochemistry and process engineering to meet the demand of its clients, a majority of whom are mid-sized companies and major international players.

With a good order book, Roger-Marc Nicoud, President and CEO of Ypso-Facto, anticipates a sustained growth: “Our offer combines scientific excellence and industrial knowledge, which meets some needs. We will keep building in this direction and propose diversified technical consultancy and software options.”

About Ypso-Facto

Ypso-Facto is a service company helping industrial firms to develop, optimize and secure their chemical and bio-processes. It brings together competences in scientific and technical consulting, process modeling, simulation and design as well as laboratory work. Ypso-Facto offers independent services based on the extensive scientific expertise and industrial experience of its executives. More information is available at www.ypso-facto.com.
