

PRESS RELEASE

Following on an excellent year in 2015, the company starts 2016 with major international projects secured.

Nancy, France, February 16th, 2016 – Ypso-Facto, a specialist in chemical and biochemical processes, announces today that for its first anniversary it has already gathered a 25-client portfolio mainly constituted of medium-sized companies and major international players. In 2015, over 50% of the company's revenue was achieved outside of France and 2016 is expected to be very dynamic: "Our order book is in very good shape. We have secured excellent projects and we anticipate a solid growth. Our credo is the combination of scientific excellence and deep industrial knowledge. We will keep developing our offer through recruitment, partnerships or acquisitions." says the company's founder and CEO, Roger-Marc Nicoud (also founder of Novasep).

Ypso-Facto was created in 2014 and currently consists of a team of 15 engineers and PhDs in chemistry, biochemistry and process engineering. It helps industrial firms to develop, optimize and secure their chemical and biochemical processes. It offers technical and scientific expertise, process simulation software and laboratory services.

Soon after its creation, the company acquired SRT Expertise et Conseil (Lyon, France), a technical and scientific expertise provider founded by Serge Ratton. In summer 2015, ChromWork™, a chromatographic process simulation software, was integrated and a US subsidiary was created in the Boston (MA) area. This already provides the company with an international span. Earlier in 2015, Ypso-Facto had been granted the Young Innovative Company label (Jeune Entreprise Innovante, J.E.I.).

About Ypso-Facto

Ypso-Facto is a service company helping industrial firms to develop, optimize and secure their chemical and bio-processes. It brings together competences in scientific and technical consulting; process modeling, simulation and design as well as laboratory work. It offers independent services based on the extensive scientific expertise and industrial experience of its executives. More information is available at www.yпсо-facto.com.
