

Ypso-Facto acquires ChromWorks™ and opens a US subsidiary

Cambridge, MA and Nancy, France – July 15, 2015 – Ypso-Facto announces today it has completed the acquisition of the full rights associated with ChromWorks™, a leading chromatography process simulation software. With ChromWorks, Ypso-Facto complements its simulation, modeling and design activity. This adds to its global offer to assist the chemical and biochemical industries in developing, optimizing and securing their production processes.

At this occasion, the service company opens a US subsidiary in the Boston (MA) area.

Dr Jay Yun, the developer of ChromWorks, joins the US subsidiary as Executive Vice President and Chief Technical Officer. “Jay is an exceptional scientist and software developer” said Roger-Marc Nicoud, Founder and CEO of Ypso-Facto. “He has completed an amazing work with ChromWorks. I am very pleased to have him on board.”

About Ypso-Facto

Ypso-Facto is a service company helping industrial firms to develop, optimize and secure their chemical and bioprocesses. It brings together competences in scientific and technical consulting; process modeling, simulation and design as well as laboratory work. It offers independent services based on the extensive scientific expertise and industrial experience of its executives.

About ChromWorks™

ChromWorks™ is an advanced computer modeling software for the simulation, design, analysis and optimization of preparative batch and continuous chromatographic processes. It provides the pharmaceutical, biopharmaceutical, petrochemical and other industries with model-based engineering and innovative solutions.
