Contents

Preface ix
Notation xi

1 Introduction to Biopharmaceutical Processes 1
  1.1 Context 1
  1.2 Single-Unit Operations 1
    1.2.1 Cell Culture 2
    1.2.2 Primary Recovery 3
    1.2.3 Protein Capture 4
    1.2.4 Polishing Steps 5
    1.2.5 Viral Clearance 5
    1.2.6 Formulation 6
    1.2.7 Additional steps 6
  1.3 Overview of the Impurities to Be Removed 7
    1.3.1 Process-Related and Product-Related Impurities 7
    1.3.2 Purity Specifications 8
  1.4 Continuous Production Processes 9
    1.4.1 Definition of Batch and Continuous Processes 10
    1.4.2 Industrial Context 12
    1.4.3 Some Engineering Considerations 13

2 Fundamentals of Protein Chromatography 27
  2.1 Introduction 27
  2.2 Interactions with Chromatographic Media 27
    2.2.1 Steric Interactions 27
    2.2.2 Hydrophobic Interactions 28
    2.2.3 Electrostatic Interactions 29
    2.2.4 Biospecific Interactions 30
    2.2.5 Complexation 31
    2.2.6 Multimodal Interactions 32
  2.3 Modes of Operation 33
    2.3.1 Single-Column Systems 33
    2.3.2 Multicolumn Systems 35
7 Protein Aggregation in Biopharmaceutical Processes

7.1 Introduction 247
7.2 Experimental Characterization of Protein Solutions 248
  7.2.1 Aggregate Content, Size, and Morphology 248
  7.2.2 Protein–Protein Interactions 251
  7.2.3 Protein Structure 254
  7.2.4 Solution Viscosity 256
  7.2.5 Summary 257
7.3 Protein Aggregation Mechanisms 257
  7.3.1 Colloidal Stability and Conformational Stability 257
  7.3.2 Aggregation Pathway 262
  7.3.3 Aggregation Rate Constants 264
  7.3.4 Population Balance Equations 266
7.4 Impact of Operating Conditions on Protein Aggregation 269
  7.4.1 Solution pH 269
  7.4.2 Salt Type and Concentration 271
  7.4.3 Temperature 274
  7.4.4 Protein Concentration 275
7.5 Critical Steps for Aggregation in Biopharmaceutical Processes 278
  7.5.1 Upstream 278
  7.5.2 Capture Step 279
  7.5.3 Polishing Steps 279
  7.5.4 Viral Inactivation 283
  7.5.5 Filtration 284
  7.5.6 Summary 287
7.6 Methods to Reduce the Aggregate Content 287
  7.6.1 Limiting Aggregate Formation 287
  7.6.2 Removing Aggregates 292
7.7 Conclusion 296

8 Conclusion 299
